Well No. _____ is located 660 ft. from N line and 660 ft. from E line of sec. 24

C NE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 24 18 S 33 E. N.M.P.M.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)

E-K Queen Pool Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3963 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 1450', with rotary to be used to a depth of 1650', and cable tools from that point to total depth.
~~Surface~~ Surface casing, 13-3/8", will be run through the shallow water sands, set in the red beds at a depth of 200' and cemented with 75 sacks.
Intermediate string, 8-5/8", will be run through the red beds to a depth of 1650', set in anhydrite, and mudded. Oil string 7" will be run to a depth of 1375' and cemented with 100 sacks. All casing run and cemented will be under methods approved by the survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
