Federal ~~WT~~ Lease is located 1960 ft. from N line and 660 ft. from E line of sec 24
Well No. 8-24

~~SE-KK~~ Sec. 24 18-S 33-E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

E-I Queen Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level 3953.1 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 4410 feet, with rotary to be used to a depth of 1710 feet, and cable tools from that point to total depth.

Surface casing, 13-3/8", will be run to a depth of 250 feet and cemented with 200 sacks which will circulate to the surface.

The intermediate string, 8-5/8", will be run to a depth of 1710 feet and cemented with 50 sacks.

The oil string, 5 1/2", will be run to a depth of 4385 feet and cemented with 100 sacks.

All casing run and cemented in this well will be in accordance with regulations set out by the Geological Survey Office.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
