Place

September 20, 1948

Date

OIL CONSERVATION COMMISSION,
 Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the _____

Wood River O. & R. Co. Miller State Well No. 4 in SE
 Company or Operator Lease

of Sec. 4, T. 17S, R. 34E, N. M. P. M., Vacuum Field.

Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
 FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

11" hole was cut to depth of 1522' and 8-5/8" casing was run. When attempt was made to cement casing and pump plug down it was found that casing had parted 900' from surface. 400 sacks cement had been pumped into casing before part was discovered and when plug was pumped down, cement was circulated back to surface. Plug was pumped down September 15th and on September 16th hole was entered with drill pipe and it was found that bottom portion of casing had set off to side of hole and was cemented.

We propose to abandon this hole and skid rig 50 feet North for another test. Inasmuch as casing is cemented and all water sands are protected we propose to fill cellar and set regulation marker in cement in top of casing. Surface will be levelled off when location to which we are skidding has been completed.

SEP 21 1948

Approved
 except as follows:

*top end of hole to
 must*

Wood River Oil & Ref'g. Co.
