Attention: Mr. A. L. Porter, Director

Re: State O & G Lease E-1449
Our Shell Angle State A #1
well. NE/4 SE/4 Sec. 10-
T. 17S - R. 34E.

Dear Mr. Porter:

We completed captioned well April 1, 1957, as a gas well with a potential of 5000 MCF per day from the Queen formation. Gas from this well is used by ourselves on Lease E-754, Sec. 2 - T. 17S-R. 34E, for gas lift and is then being gathered and sold as low pressure gas to Phillips Petroleum Company.

After producing gas for a short period, well commenced making oil. May 1, 1957, we obtained an oil allowable and produced 394 barrels of oil during the month. Gas oil ratio was estimated to be approximately 100,000/1. BTU content of the gas was 530. Gravity of oil produced was approximately 35°.

You are requested to designate the SE/4 of Sec. 10-T. 17S-R. 34E. a gas pool producing from the Queen formation. Form C-123, with copy of this letter, is being sent to Mr. R. F. Montgomery, Hobbs, New Mexico. Form C-122, and other well completion forms, have previously been filed.

Yours very truly,

S. P. YATES
