RE: New Mexico W State #5-P
New Mexico W State NCT-1 #1-O
Sec.13, T-17S, R-34E

Gentlemen:

As per your conversation with Donna Pitzer and with the findings of our OCD Inspector, we cannot approve the form C-103 subsequent report on the Plug and Abandonment of the wells listed above. The inspector has found at each site the following:

New Mexico W State #5-P:

- 1> The location has not be levelled as nearly as possible to original top ground contour and has not been cleared of all junk and equipment.
- 2> A flow-line on location, open ended and leaking oil forming puddles of crude.

New Mexico W State NCT-1 #1-O

- 1> Bolts in cement pad and cement block on location.

The above are requirements and no plugging bond will be released until all locations for plugged and abandoned wells have been inspected and Form C-103 approved. When all of the work outlined above has been done, please notify this office at Oil Conservation Division, P O Box 1980, Hobbs NM 88241 so that our representative will not have to make more than one trip to the location.

Very truly your,

OIL CONSERVATION DIVISION

Jerry Sexton
District I, Supervisor
