

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

Title

THEORY OF THE EARTH

BY J. H. VAN DIJK

PROFESSOR OF GEOPHYSICS, UNIVERSITY OF AMSTERDAM

This book is a treatise on the theory of the earth, dealing with the general principles of geophysics and the application of these principles to the study of the earth's interior. It is written in a clear and concise style, and is suitable for use as a text-book in a university course in geophysics.

The book is divided into two main parts. The first part deals with the general principles of geophysics, and the second part deals with the application of these principles to the study of the earth's interior. The first part is divided into three chapters, and the second part is divided into four chapters. The first chapter deals with the general principles of geophysics, and the second chapter deals with the application of these principles to the study of the earth's interior.

The book is written in a clear and concise style, and is suitable for use as a text-book in a university course in geophysics. It is written in a clear and concise style, and is suitable for use as a text-book in a university course in geophysics.
