Mr. Richard Spurrier
New Mexico Oil Conservation Commission
Santa Fe, New Mexico

Dear Sir;

This letter is in regard to location in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of section 6, Township 18South, Range 34 East, being a projected west extension to the Vacuum Field. We had made the location 330' from the north line and 1980' from the east line of the section, assuming that it was a field or extension well, and not a wildcat well. Realizing that the location probably was not officially included in the Vacuum Field, I thought it best to contact you before we went any further with our operations. We deem it extremely desirable to be able to drill this well only 330' from the north line as we are trying for an extension to a known reservoir and have geological reason to stay as far north as possible.

As a result of our telephone conversation of May 3rd, we are proceeding with the well and herewith plead with the Commission, through you as the Secretary, to authorize said location.

With best personal regards,

Yours truly,

A handwritten signature in cursive script that reads "Vilas P. Sheldon".

Where is this well
