September 1, 1955

Well No. 18 is located 582 ft. from {N} line and 410 ft. from {E} line of sec. 18
Section 18 18 34 34
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
18 34 34
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an expected total depth of 4450' to reach the upper formation. We will run approximately 300' of 2-1/2" casing and circulate cement to the surface. 5-1/2" od casing will be run to total depth, and cemented with 225 sacks; 400' of track will be set - 12 sacks cement will be set, and 10' sack of neat oil bottom. This will be enough to cover the well section with approximately 50' excess without running a temperature survey.

The hole will be drilled with rotary tools and the upper section will be cored.

Plate of location enclosed

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
