1/20, 1956

Well No. Fox #3 is located 330 ft. from N line and 2370 ft. from E line of sec. 18  
N2W 18 18S 34E NMPM  
 (Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
KK Queen Lea New Mexico  
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4067 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Being unable to pull the 1775' of 8-5/8" OD Casing that was mudded, it was decided to temporarily abandon this well with the possibility of drilling same deeper in the future. With the above exception the well has been plugged as previously discussed, which is as follows:

Mudded back to 4000' with a 10 sack cement plug.  
 Mudded back to 3100' with a 20 sack cement plug at base of salt  
 Mudded back to 1800' with a 20 sack cement plug at top of salt, and at bottom of 8-5/8" Mudded Casing. 8-5/8" Casing pumped full of mud with cap on top, and regulation 4' marker. Location will be cleaned up, and supplementary well history report filed.

This change discussed with Mr. Godfrey on 12/19/54 by Sivley.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
