(Range)

(Meridian)

**S.E. Canon**

(Field)

**Los**

(County or Subdivision)

**New Mexico**

(State or Territory)

The elevation of the derrick floor above sea level is **5247** ft. **Ground Level**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to an approximate total depth of 4750' to test the Upper Queen and Penrose formation. 300' of 8-5/8" OD Casing will be run and cemented to the surface. If production is encountered 5-1/2" OD Casing will be run to total depth and cemented with 200 Sacks of Cement.

Rotary Tools will be used.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **Thomas J. Sivley**
