Federal #7" lease
Well No. 5-13 is located 660 ft. from N line and 600.5 ft. from E line of sec. 19

N. 19-30-10 19-30 34-1 N. 19-30-10
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
19-30-10 19-30 New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3370 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-

I propose to drill this well to a depth of 1600 feet, with rotary tools to be used to a depth of 1600 feet, and cable tools from that point to total depth.

Surface casing for this well, 13-3/8", will be run to a depth of 250 feet and cemented with 200 sacks, which will circulate to the surface.

Intermediate string, 8-5/8", will be run to a depth of 1600 feet and cemented with 50 sacks.

For oil string for this well, 5", will be run to a depth of 4375 feet and cemented with 100 sacks.

All casing run and cemented in this well will be in accordance with regulations set out by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
