Federal "T" Lease

Well No. 6-19 is located 660 ft. from N line and 1879 ft. from W line of sec. 19

N 1/4 Sec. 19 18 South 34 East N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

E-K Queen Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4020 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 4415 feet, with rotary to be used to a depth of 1675 feet, and cable tools from that point to total depth.
Surface casing, 13-3/8", will be run to a depth of 250 feet and cemented with 200 sacks which will circulate to the surface.
The intermediate string, 8-5/8", will be run to a depth of 1675 feet, set in anhydrite, and cemented with 50 sacks.
The oil string for this well, 5-1/2", will be run to a depth of 4390 feet and cemented with 100 sacks.
All casing run and cemented in this well will be in accordance with regulations set out by the Geological Survey Office.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
