REPORT OF THE COMMISSIONER

The Commission on the Administration of Justice, created by the Legislature in 1913, has the honor to submit herewith its report for the year 1914. The Commission has the pleasure to announce that it has completed its study of the subject of the reorganization of the courts and the administration of the judicial system. The Commission has found that the present system is inefficient and costly, and that a reorganization is necessary to bring about a more efficient and economical administration of justice. The Commission has proposed a plan of reorganization which it believes will accomplish these ends. The plan provides for the consolidation of the courts, the reorganization of the judges, and the improvement of the methods of selecting judges. The Commission believes that these changes are essential for the proper administration of justice in this State.

The Commission has also studied the subject of the improvement of the methods of selecting judges. It has found that the present method of selecting judges, by the Legislature, is inefficient and costly. It has proposed a plan of reorganization which provides for the selection of judges by the people. The Commission believes that this plan will result in a more efficient and economical administration of justice. The Commission has also studied the subject of the improvement of the methods of selecting judges. It has found that the present method of selecting judges, by the Legislature, is inefficient and costly. It has proposed a plan of reorganization which provides for the selection of judges by the people. The Commission believes that this plan will result in a more efficient and economical administration of justice.
