### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In order to produce this well from the perforated interval 12,187-12,191 of the Devonian horizon, it is proposed to install a Kobe pumping system as permanent pumping equipment. This well has insufficient bottom hole pressure to flow continuously but has the capacity to produce at top allowable upon installation of the above equipment.

Permission is requested to perform the above work.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
