### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill an 11,000' Pennsylvania lime test, using rotary tools all the way.

I expect to set 350' of 1 3/8" surface pipe with 350 sacks.

I propose to set 8 5/8" intermediate casing in the solid dolomite at approximately 5000', using 200 sacks.

I plan to run approximately 10,980' of 5 1/2" N-80 oil string, setting through the expected pay with 300 sacks.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
