

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
 SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL			

Oil and Gas Inspector _____ PLACE _____ DATE _____

Mr. J. D. Hunter _____ State Geologist,

Santa Fe, N. Mex.

Following is a report on the work done and the results obtained under the heading noted above at the

Noble and Company

Well No. 1 in the

SW $\frac{1}{4}$

COMPANY OR OPERATOR

of Sec. 24

1. Introduction

The purpose of this study is to investigate the effects of

the proposed system on the performance of

the system under various conditions.

The study is organized as follows. Section 2 describes the system architecture and the experimental setup. Section 3 presents the results of the experiments. Section 4 discusses the implications of the results. Section 5 concludes the study.

The system architecture is shown in Figure 1. The system consists of a client and a server. The client is a personal computer with a 100 MHz processor and 64 MB of RAM. The server is a 386 PC with a 33 MHz processor and 16 MB of RAM. The system is connected to a local area network.

The experimental setup is as follows:

1. The client is connected to the server via a network card.

2. The client is connected to the server via a network card.

3. The client is connected to the server via a network card.

4. The client is connected to the server via a network card.

5. The client is connected to the server via a network card.

6. The client is connected to the server via a network card.

7. The client is connected to the server via a network card.

8. The client is connected to the server via a network card.

9. The client is connected to the server via a network card.

10. The client is connected to the server via a network card.

11. The client is connected to the server via a network card.

12. The client is connected to the server via a network card.

13. The client is connected to the server via a network card.

14. The client is connected to the server via a network card.

15. The client is connected to the server via a network card.

16. The client is connected to the server via a network card.

17. The client is connected to the server via a network card.

18. The client is connected to the server via a network card.

19. The client is connected to the server via a network card.

20. The client is connected to the server via a network card.

21. The client is connected to the server via a network card.

22. The client is connected to the server via a network card.

23. The client is connected to the server via a network card.

24. The client is connected to the server via a network card.

25. The client is connected to the server via a network card.

26. The client is connected to the server via a network card.

27. The client is connected to the server via a network card.
