Mr. E. B. Clark
612 City National Bldg.
Wichita Falls, Texas

Dear Mr. Clark:

We are enclosing supplement #14 to the January gas proration schedule assigning an 80 acre allowable to your J. W. Cooper 2-B, 3-20-37, Eumont pool, for the month of January. It was necessary to assign this allowable in the name of E. B. Clark since you have no bond under the name of Clark and Christie. If this well is to be operated under the name of Clark and Christie, it will be necessary for you to file the required bond under the name of that firm with our Santa Fe office.

Yours very truly,

OIL CONSERVATION COMMISSION

A. L. Porter, Jr.
Proration Manager

DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C.

1. The first part of the report is a general statement of the purpose and scope of the investigation. It is followed by a description of the methods used in the study. The results of the investigation are then presented in a series of tables and figures. The final part of the report is a discussion of the results and a conclusion.

2. The second part of the report is a detailed description of the methods used in the study. It includes a description of the experimental design, the subjects, the materials, and the procedures. It also includes a description of the data collection and analysis methods.

3. The third part of the report is a series of tables and figures that present the results of the investigation. The tables are arranged in a logical order, and the figures are used to illustrate the data. The results are discussed in a series of paragraphs that follow the tables and figures.

4. The final part of the report is a discussion of the results and a conclusion. The discussion includes a summary of the findings, a comparison of the results with previous studies, and a discussion of the implications of the findings. The conclusion is a brief statement of the overall findings of the study.
