Re: Dual Completion - New Mexico State
"AK" Well No. 1, 1980 feet from
West line, 1880 feet from South
line, Section 32, T-18-S, R-37-E,
Lea County, New Mexico

New Mexico Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Gentlemen:

Humble Oil & Refining Company respectfully requests that we be granted a permit to dual complete our New Mexico State "AK" Well No. 1 as a gas well from the upper Queen in the Summit Pool and as an oil well from the lower Queen in the Summit Pool. In support of this application we submit the following information.

1. New Mexico State "AK" Well No. 1 is located 1980 feet from the West line and 1880 feet from the South line of Section 32, T-18-S, R-37-E, Lea County, New Mexico.
2. Said well is now producing as an oil well in the Summit Pool from the Queen from perforations 3680 - 3810 feet. We plan to continue to produce this section as an oil well.
3. The upper Queen will be perforated for gas production at an approximate interval of 3625 - 3710 feet. This section will produce as a gas well through the casing.
4. A packer will be set at approximately 3600 feet so as to segregate the producing intervals.
5. The dual completion of this well will be in the interest of conservation and the mechanics of the dual completion are feasible and practical.
6. The non-standard gas production unit will be 240 acres described as the SW/4 and NW/4 of NW/4 and SW/4 of SE/4 of Section 32, T-18-S, R-37-E, Lea County, New Mexico.
7. Said production unit lies wholly within a single governmental section and consists of contiguous quarter quarter sections.
