FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Wells # 1-2-3-and 4 have heretofore been ^{flowed} into separate tanks. We propose to flow these wells into a Central Tank Battery, so manifolded that separate tests of the various wells may be made at any time.

At present the battery on this lease consists of 12- Low 500 barrels steel tanks. By centralizing, as outlined above, we will be enabled to salvage a portion of these tanks and remove them to other leases for further use.

This battery is located in the Center of the Northwest Quarter of Section 30-18-38.

(See Reverse side of this sheet for diagram of battery manifold)
