Hobbs, New Mexico, Feb. 9, 1934

Mr. J. D. Hunter State ~~Geologist~~ Oil & Gas Inspector
Santa Fe, N. Mex.

Following is a notice of intention to do certain work as described below at the Shell
Petroleum Corporation, H. D. McKinley Well No. "A" #5 in S.E. Quarter
COMPANY OR OPERATOR LEASE
of Sec. 19, T. 18S, R. 38E, N. M. P. M., Hobbs
Oil Field, Lea County.

DETAILS OF PROPOSED PLAN OF WORK

This well will be killed by pumping oil into the tubing. It is then proposed to repair the producing White Lime Section by placing approximately 1000 gallons of Commercial Hydrochloric Acid Solution in the bottom of the hole. The well will then be shut in for about 72 hours before it is placed back on production.

The present potential of this well is 3560 barrels of oil and a Gas-Oil Ratio of 610 cu. ft. gas per barrel of oil.

This well has a low potential. The well has only penetrated the upper White Lime which in this case has a comparatively low porosity.

DUPLICATE

Approved FEB 12 1934, 19_____
except as follows:
