17. Describe Proposed or Completed Operations (Clearly state all pertinent details and give proposed date of starting any proposed work) SEE RULE 1103.

In January 1962 this well was deepened to 4342' and a liner was cemented in place. Liner was perforated 4235-48'. In January 1965 the zone 4300-06' was perforated. These new perforations increased the water 20 BPD and did not affect the oil production. Recent production was 2-3 BOPD and 25-27 BWPD.

We propose to set a bridge plug at 4200' with one sack cement on top. Perforate 4-1/2" liner @ 3971, 87, 4009, 38, 46, 50, 66, 89, 4100, 08, 28, and 32' with one jet each. Treat perforations with 1,250 gallons 15% NE acid.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
