

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
 SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL		Report on Acid Treatment	x

Carlsbad, New Mexico, April 18, 1933

PLACE

DATE

Mr. E. H. Wells State Geologist,
 Santa Fe, N. Mex.

Following is a report on the work done and the results obtained under the heading noted above at the
Atlantic Oil Producing Company Grimes Well No. 1 in the
COMPANY OR OPERATOR LEASE
SW of SE of Sec. 20-18-38, T. , R. , N. M. P. M.,
Hobbs Oil Field, Lea County.

The dates of this work were as follows: April 3 to 6, 1933

Notice of intention to do the work was (was not) submitted on Form SG on , 19 , and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The well was killed with dead oil, after which 1000 gallons of XX Dewell acid mixture was pumped into the hole, and blanketed with dead oil, enough oil being pumped into the tubing to make sure that the acid was in the bottom of the hole. The well remained dead and shut-in for about 65 hours; and was then swabbed in through the tubing. A potential test taken on April 7 indicated that the well would flow 6351 bbls. through the tubing, as compared to a previous potential of 2981. Tubing pressure before the treatment was 450 pounds, and after the treatment 540 pounds.

Subscribed and sworn to before me this

 day of , 19

NOTARY PUBLIC.

My commission expires
