OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

Hobbs, New Mexico
(Place)

February 13, 1953
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the McKinley B. Lease

MORRIS R. ANTWEIL Well No. 1-A in G
(Company or Operator) (Unit)
SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 20, T. 18 S, R. 38 E, NMPM., Hobbs Pool
(40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This well has 7" casing to 4100' with ID at 4270'. Liner was previously set from 4270 to 4050' and cemented. Well has been producing from perforations from 4252 to 4247'. Because of insufficient production, the Operator intends to work the well over in the following manner:

Baker wire line bridge plug will be set in 5" liner at 4240'. Lane-Wells will dump an 8-foot quick set cement with bailer and plug back to 4232'. Operator will then jet perforate liner in two zones--in the Grayburg from 4147 to 4157' and from 4178 to 4190'. Well will be swabbed to test for water shut off. If water is shut off, then Operator plans for Cardinal Chemical Company to acidize with 500 gallons of Jel, 750 gallons of Unisol acid plus 300 gallons of Jel and 750 gallons of Unisol acid.

Approved....., 19.....
Except as follows:
