Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the _____
Gulf Oil Corporation North Grimes Well No. 4 in NE SW
 Company or Operator Lease
 of Sec. 21, T. 18S, R. 32E, N. M. P. M., Hobbs Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well has been abandoned for the past year. All efforts to produce oil from the well from the producing horizons penetrated have failed. Careful study of our producing records and reservoir information of this well and wells of other operators in the area indicate that the production of oil in commercial quantity is not available.

A Baker cement retainer has been set at 4085' or some 40' above the casing shoe and the exposed formation below has been plugged with 125 sacks of cement. We propose to fill the casing to 2000' with mud, set a cement plug, shoot off casing and recover approximately 2000' of 7" casing. The hole will then be filled to the surface with mud and another cement plug placed with the regulation marker on the surface. The 247' of 13" casing will be left in the hole for protection to fresh sub-surface waters.
