

N<sup>o</sup> MEXICO OIL CONSERVATION COM<sup>MISSION</sup>

Santa Fe, New Mexico

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Field,

Lee

County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

The well was drilled to 4883' with 100% water, and plugged back to 4585' and shot with 30 Qts, the well was dry at this depth, no water, oil or gas. We now propose to plug and abandon the well as follows:-

Fill the hole with heavy mud to 4523' or to bottom of 5-1/2" Casing & dump 3 sax cement, pull the 5-1/2" Casing and fill hole to 3581' or to bottom of 7-5/8" Casing and dump 3 sax cement, pull the 7-5/8" Casing and fill hole with mud to base salt or 3100' and dump 30 sax cement and fill up again with mud to top of salt or 3000', dump 3 sax cement and fill hole to top with heavy mud and place cement cap on top of hole.

Will then fill cellar and pits and clean off location.

Figure 1. The effect of the concentration of the *Agaricus bisporus* spores on the growth of *Agaricus bisporus* on the substrate. The concentration of the spores was 10<sup>4</sup> spores/g substrate (a), 10<sup>5</sup> spores/g substrate (b), 10<sup>6</sup> spores/g substrate (c), 10<sup>7</sup> spores/g substrate (d), 10<sup>8</sup> spores/g substrate (e), 10<sup>9</sup> spores/g substrate (f). The substrate was a mixture of 100 g of straw and 100 g of manure. The substrate was incubated at 25 °C for 7 days. The substrate was then inoculated with the spores and incubated at 25 °C for 7 days. The substrate was then incubated at 25 °C for 7 days. The substrate was then incubated at 25 °C for 7 days.
