DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an approximate total depth of 4500' to test the San Andres formation. We will run approximately 1850' of 8 5/8" - 24# seamless casing and cement w/ 900 sac. We will run approximately 4425' of 5 1/2" casing and cement with enough cement to adequately cover the Seven Rivers formation.

Designation of Operator filed with Intention to Drill on No. 1 well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
