

DEPARTMENT OF THE STATE GEOLOGIST

Form SG-106

STATE LAND OFFICE

SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Reports should be made within ten days of completing the work indicated and should be submitted in duplicate.

Indicate nature of report by checking.

Notice of intention to drill	Subsequent record of shooting
Notice of intention to change plans	Notice of intention to pull or otherwise alter casing
Notice of date for test of water shut-off	Notice of intention to abandon well
Report on result of test of water shut-off X	Supplementary well history
Notice of intention to re-drill or repair well	Monthly report of operations
Notice of intention to shoot	

Mr. **T. A. Stancliff**
State Geologist
Santa Fe, New Mexico.

Wink, Texas. N. Mex. **July 15, 1934.**

Following is a report giving the results of work done as indicated above at **W. D. Grimes**

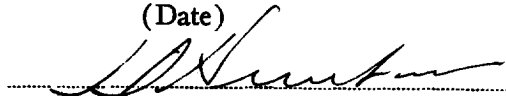

Well No. **3** in **NW/4** of Sec. **23** T. **18S** R. **38E**,
N.M.P.M., **Hobbs** Oil Field **Lea** County.

DETAILS

State names of and expected depths to objective sands or producing horizon; show sizes, weights, and lengths of casing run or proposed; indicating mudding jobs, cementing points, water horizon, number of days operated, and total depth at end of month, and other important information.

7" CD Casing was cemented with 250 sacks of cement at a depth of 3056,
on July 6, 1934 pressure test on casing was taken by pump method and
pressure test was 750 pounds.

DUPLICATE

Approved **JUL 16 1934**

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were incubated in the presence of 100 mg/ml of gentamicin and 100 mg/ml of rifampicin. The concentration of the *Agrobacterium* suspension was 10⁶ cells/ml. The transformation efficiency was determined by the number of transformants per 10⁶ cells. The data are the mean \pm SD of three independent experiments.
