	<input checked="" type="checkbox"/> Other _____

Detailed account of work done, nature and quantity of materials used and results obtained.

The cellar was dug out and a high pressure bleeder line was run to the surface from the following annulus: surface-intermediate and intermediate-oil strings. The opening of the valves in the cellar was witnessed by E. J. Fischer, District Engineer of District I of Oil Conservation Commission on January 22, 1958. The cellar was then filled in again.
