DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To workover Federal Bowers A-9 as follows: drill out existing packer, test for source of bottom water, plug off bottom water, acid treat with 500 gallons, and place well back on production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
