### DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Total depth of this well is 4190'. 7"OD casing set at 3900'.  
 Treated with 1,000-gallons of Dowell X acid  
 The last few weeks before treating could produce only about 25-bbls. oil per day and hold seal with tubing pressure 200# and ratio about 1500, since treatment can produce 50-bbls. per day with 1500 ratio. Did not take open tubing test as separator would not handle gas.
