

DUPLICATE

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in TRIPLICATE to the District Office, Oil Conservation Commission, within 10 days after the work specified is completed. It should be signed and filed as a report on Beginning Drilling Operations, Results of test of casing shut-off, result of plugging of well, result of well repair, and other important operations, even though the work was witnessed by an agent of the Commission. See additional instructions in the Rules and Regulations of the Commission.

Indicate Nature of Report by Checking Below

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF PLUGGING WELL		REPORT ON RECOMPLETION OPERATION		REPORT ON (Other) Temperature Survey and Bradenhead Test.	

September 10, 1953 P.O. Box 547, Hobbs, N.M.

Following is a report on the work done and the results obtained under the heading noted above at the

Tide Water Associated Oil Company
(Company or Operator)

Grimes
(Lease)

Well No. 4 in the SE 1/4 NE 1/4 of Sec. 29

T18-S, R38-E, NMPM, Hobbs, Pool, Lea County.

The Dates of this work were as follows: September 4, 1953

Notice of intention to do the work (was) (was not) submitted on Form C-102 on _____, 19____.

(Cross out incorrect words)

and approval of the proposed plan (was) (was not) obtained.

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The above well was shut in on September 3, 1953, at 9:00 A.M. A temperature survey was run in the well at 10:00 A.M. on September 4, 1953, with no evidence of anomaly. A bottom hole pressure was run after running the temperature survey.

A bradenhead valve was opened to check for pressure in the annulus between the 9-5/8" casing and the 7" casing. A small amount of accumulated pressure was exhausted in 10 minutes with no evidence of oil present. It is believed that the gas may have been from the Byers section, which is below the 9-5/8" casing seat. The annulus between the 12 1/2" casing at 220' and the 9-5/8" casing is open to the atmosphere.
