FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

To install high pressure separator on Humble Federal Bowers A-1 and to use the gas produced with the oil from this well as a gas supply to gas lift wells on Humble property which are making sufficient water with the oil to require agitation with pumping equipment, or periodic swabbing to maintain continuous oil production. In order to conserve gas, it is contemplated to use the proper size flow string or flow valves or both. At present time, it is desired to take Humble A-2 and A-3 off the pump and place them on gas lift. At present these two wells are pumping in excess of 80 percent water.
