Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

We plan to pull tubing and set a bridging plug just below the depth at which the temperature anomaly occurs, about 3100'. We will then perforate the 6-5/8" casing at the anomaly and circulate cement back to the surface. When cement has set, perforations will be tested and if O.K., bridging plug will be drilled out, tubing will be run and well will be put back to producing.
