

Hobbs, New Mexico  
December 13, 1948

Oil Conservation Commission  
Santa Fe, New Mexico

Gentlemen:

In submitting this Notice of Intention to Drill the West Grimes No. 15, we are well aware that the West Grimes No. 6 is open to the Hobbs lime, which would indicate two wells on the same 40 acre lease would be producing from the same zone. However, it is our intention to plug back the West Grimes No. 6 to the Bowers sand and, as soon as the authority for expenditure to perform this work is approved by our Tulsa Office, the necessary forms will be submitted to you for approval.

This letter accompanies the form C-101 for West Grimes No. 15 in order to clarify our intention to drill a second well to the Hobbs lime before the West Grimes No. 6 is plugged back.

Very truly yours,
