On November 19, 1948, at 12:30 p.m. 30 hours had elapsed since running 3090' of 5½" new casing in subject well and cementing with 1000 sx. to be used as oil string. At this time casing shut off was tested as follows:

A pressure of 1000# was built up and held for 30 minutes, testing ok. Cement plug was drilled and a pressure of 1000# was again built up and held for 30 minutes. This, too, tested ok. Drilling operations were resumed.
