1. The first step in the process of identifying a word is to determine the word's position in the sentence. This is done by looking at the word's position relative to the other words in the sentence. For example, if the word is at the beginning of the sentence, it is likely to be a subject or a verb. If it is in the middle, it is likely to be an object or a modifier. If it is at the end, it is likely to be a preposition or a conjunction.

LETTER TO THE EDITOR OF THE NEW YORK TIMES
