

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL		REPORT ON RESULT OF REACIDIZING	XIX

PLACE

DATE

Mr. E. H. Wells State Geologist,
Santa Fe, N. Mex.

Following is a report on the work done and the results obtained under the heading noted above at the

Shelly Oil Company

E. H. Turner

Well No. 2

in the

1/2 of NE 1/4

COMPANY OR OPERATOR

of Sec. 34

T. 18S

LEASE

R. 38E

N. M. P. M.,

Hobbs

Oil Field,

Lea

County.

The dates of this work were as follows: July 14, 1934

Notice of intention to do the work was (~~was not~~) submitted on Form SG 105 on

June 30, 1934, 1934, and approval of the proposed plan was (~~was not~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Loaded hole and killed well with 139 barrels oil pumped into well thru casing. Then pumped acid, thru tubing, into pay formation and when acid reached pay formation, 800 pounds pressure was built up but this pressure was soon dissipated and formation took practically all the acid at vacuum. Displaced acid, in tubing, and drove same into formation with 82 barrels oil. After remaining shut in for 48 hours, after acidizing, well was opened but would not flow. It was then necessary to swab in. Swabbed well in and flowed normally for a ten day period and when tested for potential, received a potential of 6,966 barrels per 24 hours, with 11,500,000 cubic feet of gas.

DUPLICATE

Subscribed and sworn to before me this

..... day of, 19.....

NOTARY PUBLIC.

My commission expires.....

Remarks:

I hereby swear or affirm that the information given above is true and correct.
