Re: S. P. Johnson SWD Well #1-L, 5-18-39

Gentlemen:

This is to confirm our conversation in my office at Hobbs, New Mexico, with Mike Caudill concerning the above referenced well on March 26, 1986.

It is my understanding that Mr. Caudill is reasonably certain that the packer in this well is set at approximately 4300 to 4400 feet. The approved injection interval according to order R-3519 is at 5300 feet to 5800 feet.

Please advise me of your intentions concerning this well by April 11, 1986.

Very truly yours

OIL CONSERVATION DIVISION
