

ELLIOTT HALL B

6/8/93     TIH to test casing. Set plug @ 11,223'. Packer @ 11,143'. Tested good @ 500#. Ran tie in log to check plug. Unset packer, lower to top of plug. Broke circulation, spotted 2 bbls. of acid across place to shoot. Raised packer to 11,143'. Set packer. Perforated from 11,202'-06', 8 shots. Instant vacuum. Came out with wireline. Pumped 500 gals. acid, displaced to perfs.

6/10/93    Well on vacuum, found fluid level @ 10,000'. Pulled tubing and packer. Left retrievable plug @ 11,223'. Ran back 2 jts. mud anchor. Plugged on bottom, perf'd sub, mechanical hold down. Tubing anchor 10 jts. above hold down. 336 jts. N-80 tubing, set at 10,997.88'.

6/11/93    Ran pump and rods. Started well pumping.
