Re: Application for Single  
Tubingless Completion,  
State of New Mexico "AE"  
Well No. 6, Vacuum (Abo)  
Pool, Lea County, New Mexico

Attention Mr. A. L. Porter, Jr.

Gentlemen:

TEXACO Inc. respectfully requests administrative approval of an exception to New Mexico Oil Conservation Commission Rule 107 (e) for its State of New Mexico "AE" Well No. 6. This well is a proposed Single Tubingless Completion in the Vacuum (Abo-Reef) Pool, and is located 660 feet from the west line and 1980 feet from the south line of Section 12, T-18-S, R-34-E, Lea County, New Mexico.

The production casing string will consist of 2-7/8 inch O.D. tubing set at approximately 8950 feet in a 7-5/8 inch hole. Completion will be through perforations from approximately 8750 to 8850 feet in the Abo (Reef) formation. The expected production is not corrosive, however, some paraffin accumulation is expected and the top 2000 feet of casing will be internally plastic coated for paraffin. It is expected this completion will be oil and will flow initially.

This zone has been approved by the New Mexico Oil Conservation Commission as a tubingless completion in other single completions in this area. An instance is Order No. MC-1180, TEXACO Inc.'s, State of New Mexico "R" (NCT-4) Well No. 2.
