OCTOBER 19, 1978

RE: Daily Log Report for the Conoco State A #2.

Report was called in daily to the Continental Oil Company, Production Department at 1001 North Turner, Hobbs, NM 88240. Telephoned, 393-4141, talked to Jackie, Mr. E. G. Stevensons' Secretary in lieu of his absence. Reports went as listed below:

10/11/78 - 9:30 AM - Rigged up and moved in the tubing.

10/12/78 - 9:45 AM - Started working on it.

10/13/78 - 9:30 AM - Rigged up and started floating. Floated down to 2840' thru very heavy mud. Hit the plug in the 7 5/8. Drilled 360' of cement out.

10/14/78 - Called report in for this day on 10/16/78 at approximately 1:35 PM. Run the pipe down to 4300' and hit the plug. Started swabbing.

10/15/78 - Called report in for this day on 10/16/78 at approximately 1:35 PM. Drilled out the plug down to 4600' at Top of the 4 1/2 casing where it was shot off. Circulated out, good show of oil and gas cut mud. Come out of the hole. Put on 3 3/4 bit and drilled out the 4 1/2 casing down to 5212'.

10/16/78 - 1:35 PM - Fluid level rose to 1800'. Swabbed on it for 6 hours. Lowered the fluid to 3400'. Pulled tubing out of the hole. Set a bridge plug at 4900' in the 4 1/2 casing. Pulled back out to 4600'. Started swabbing. Was getting oil and gas cut mud. Shut well in. Rigged down for further observation and consultation. (Will resume calling in reports when the well is in operation again.) Tested the lower zone of the Clearfork at 6200'.
