The elevation of the **Ground level** ~~correlation~~ above sea level is **3833** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location to test the Queen formation at approximately 4400 feet.

We propose the following casing program:
250 feet of 8 5/8" or 9 5/8" surface casing - 50 sacks of cement
4 1/2" casing to T.D. if production is encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
