On 10-21-63, while making a trip after completing a DST No. 1 at Street 11, 4-1/2" casing collapsed and parted at a depth of 1770'. After 25 days of unsuccessful attempts to re-enter the 4-5/8" casing, it has been decided to abandon the hole.

It is now proposed to abandon the hole as follows:

Spot plugs as follows: 2000' ex at 2440' to 2320'; 150' ex from 2320' to 2200'; 15' ex at surface. Mud liner fluid between plugs. Once the muder and restore location to its natural condition. Casing left in hole.
10-21-63 Sur use to 830'; Cement circulated.
9-5/8" 1779'-1790', cemented with 1000' ex in 3 stages.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
