T.D. 13,700' Lime, Shale and Sand. Plugged and abandoned. This well was originally drilled to a T.D. of 10,520' by William G. Ross and plugged as a dry hole in September, 1963. Sinclair Oil and Gas, now Arco, deepened the well to a T.D. of 12,900' and plugged it as a dry hole in January, 1964. We cleaned out the hole to the OTD of 12,900', drilled it deeper to a new T.D. of 13,700' in the Chester Formation, ran a DST in the Morrow Zone while drilling deeper, ran logs at the new T.D. of 13,700', received verbal approval on our plugging procedure from your office and plugged the well for the third time on 11-17-74.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
