Re: Correction to Application for
Triple Conventional and Dual
Tubingless Completion, State
of New Mexico "L", Well No. 6,
Lea County, New Mexico

ATTENTION: Mr. A. L. Porter, Jr.

Gentlemen:

Attached is a revised application for multiple completion and diagrammatic sketch to correct the initial application for TEXACO Inc. State of New Mexico "L" Well No. 6, Lea County, New Mexico, dated May 3, 1963. The estimated perforated Pennsylvanian interval should read 10,250 feet to 10,300 feet instead of the indicated 10,925 feet to 10,935 feet.

Your indulgence shall be appreciated and all offset operators are being sent copies of this corrected application this date by registered mail.

Yours very truly,

* Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NOTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard perforation unit in either or both of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.
