

SURFACE USE PLAN

OIL & GAS
U.S. GEOLOGICAL SURVEY
ROSWELL, NEW MEXICO

Lease No. NM-0175774 (PC-392)
Lease Name Plains Unit Federal
Well No. 4-Y
Location 710 FSL & 660 FWL, Sec. 21, T19S, R32E, Lea Co.

1. The Plains Unit No. 4-Y well will be reworked and a beam type pumping unit installed on the existing well pad. There will be no changes in the existing lease roads or flowlines.
2. In accordance with the attached plat of survey a 115 KV power line will be installed wholly within the unit boundaries and will consist of 5 330' and 1 350' spans of raptor proof primary power line and 1 330' span of 3 wire secondary power line. The surface disturbance will be limited to the setting of 6 power poles along the survey of centerline and one power pole set on the edge of the existing well pad.
3. An archaeological clearance report has been prepared and a copy is attached hereto. There are no archaeological occurrences along the proposed route and approval is recommended in the attached report.
