Re: Application for Single Tubingless  
Completion, State of New Mexico  
"L" Well No. 9, Vacuum (Glorieta)  
Pool, Lea County, New Mexico.

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

TEXACO Inc. respectfully requests Administrative approval of an exception to New Mexico Oil Conservation Commission Rule 107(e) for the State of New Mexico "L" Well No. 9. This well is a proposed single tubingless completion in the Vacuum (Glorieta) Pool, and is located 1650 feet from the north line and 660 feet from the east line of Section 1, T-18S, R-35E, Lea County, New Mexico.

The production casing string will be 2-7/8" O.D. set at approximately 5850 feet in a 7-5/8" hole. Completion will be through perforations from approximately 6100 to 6120 feet in the Glorieta Formation.

It is anticipated that this completion will flow initially and that no severe corrosion or paraffin problems will be encountered.

This zone has been approved by the New Mexico Oil Conservation Commission as a single tubingless completion in this area. An instance is the State of New Mexico "O" (NCT-1) Well No. 15, Order No. NC-1435.

Attached is a diagrammatic sketch of the proposed tubingless completion and a plat showing the location of all wells on the State of New Mexico "L" Lease and all offset wells along with the names and addresses of all offset operators. A copy of this request is being sent this date to all offset operators by registered mail.

Your early consideration of this request would be greatly appreciated.

Yours very truly,

  
J.G. Blevins, Jr.  
Assistant District Superintendent
