Re: Greenwood "6" Federal #1
Unit N of Sec. 6, T-19-S,
R-32-E, Lea Co., NM

Gentlemen:

Initial flowing test on caption well indicates a very small gas well.

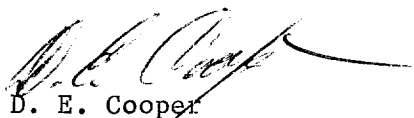

Consequently, any Multipoint Back Pressure Tests would not be meaningful.

We are requesting that the following well test information be accepted in lieu of the required Multipoint Back Pressure Test.

Sept. 27, 1977

Well flowed 24 hrs. Recovered 100 MCF gas, 2 bbls. condensate and 2 bbls. formation water. Well was flowing into Phillips Petroleum Co.'s Gathering system which carried a line pressure of 35# PSI.

Yours very truly
C & K Petroleum, Inc.
