Mr. A. L. Porter, Jr.
Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico

Dear Sir:

L. R. French, Jr., and Jack N. Blair drilled a Devonian test 660 FNL & 1650 FWL of Section 28, T-18-S, R-33-E, Lea County, New Mexico. The well tested water in the Devonian, however, the well was completed as a Morrow gas well.

Since this well is a non-standard location, we are requesting a non-standard 240 acre gas unit which includes the NE/4 and the E/2 of the NW/4 of Section 28, T-18-S, R-33-E. On March 4th, we wrote a letter to Mobil Oil Company informing them that they either give us letters of waiver or join us on a 320 acre unit. We have contacted them several times and have received no answer. Therefore, we assume that Mobil is uninterested in joining in this gas unit. A copy of the letter to Mobil is enclosed. Also attached is a plat of the area showing all offset operators.

We have made a gas contract with with Southern Union, we have all of our equipment in place, and the well is ready to deliver gas. We want to sell the gas and Southern Union wants to buy it. Therefore, will you please give us an allowable for a non-standard unit in a non-standard location.

Very truly yours,

L. R. FRENCH, JR.

David H. Donaldson
