17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Continental Oil Company proposes to assume operations of the Pennzoil Oil Company's Conoco State Well No. 1 which has been drilled to a TD of 11,675' and determined to be dry and plugged back to 7112'.

It is our intentions to assume operation of this well from Pennzoil Oil Company, change the name to State B-31 No. 1 and since we retained all rights above 7700' in our Farmout Contract, we plan to complete in the Drinkard formation using the following procedure: (1) Run microlog; (2) Run Drill Stem test in Drinkard, set 4 1/2" casing, if productive, and complete; (3) Set plugs opposite Drinkard perforation, if not productive; (4) Run DST's in Clearfork formation and, if productive; (5) Run 4 1/2" casing, perforate, treat, and complete.

A subsequent report will be submitted upon completion of this work.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
